

## APPENDIX

The manner of amending claims is shown below with added material underlined and deleted material bracketed.

--1(thrice amended). A method for displaying programming information, comprising:

- (a) displaying a video comprising a plurality of frames on a portion of a display;
- (b) displaying a first panel in response to a first signal from a user interface, said first panel being displayed on another portion of said display simultaneously with said video, said first panel containing information from at least one of a plurality of records, said records containing programming information, each of said records having an associated time and an associated channel, and said first panel [having] displaying on said display an associated time range from a first time to a second time and an associated range of channels, where said first time is the earliest time displayed on said display in response to said first signal and said second time is the latest time displayed on said display in response to said first signal;
- (c) selecting a first record in response to a second signal from said user interface;
- (d) selecting a second record in response to a third signal from said user interface, where said second record has an associated time and an associated channel, where said associated time of said second record is outside of said associated time range of said first panel; and
- (e) in response to selecting said second record, displaying simultaneously with said video a second panel, said second panel having an associated time range from a third time to a fourth time

where said third time is the same as said second time and is the earliest time displayed on said display in response to said second signal, [said fourth time is not the same as said first time,] and said second panel having an associated range of channels that is the same as the associated range of channels of said first panel.

- 20(amended). A method for displaying programming information, comprising:
- (a) displaying a video comprising a plurality of frames on a portion of a display;
  - (b) displaying simultaneously with said video, at the selection of a user, any selected [a selective] one of [either]
    - (i) a first panel;
    - (ii) a second panel; or
    - (iii) a first panel and a second panel in response to at least one signal from a user interface, said first panel having an associated time range and an associated channel range and containing selective information from at least one of a plurality of records, each of said records having
      - (i) an associated time period;
      - (ii) an associated channel; and
      - (iii) program content information including a program title, and said second panel containing information from only one of said plurality of records; and
  - (c) each of said first panel and said second panel being selectively browsable to different time or channel ranges in response to a second signal from said user interface.
